

ABSTRACT

~~The present invention relates to an~~ An applicator ~~(10; ... ; 810)~~ including an application face ~~(21; ... ; 821)~~ formed by a material incorporating a plurality of cells opening onto the application face via at least one emergent edge ~~(25)~~, the application face being at least partially covered by a flock coating ~~(30; ... ; 830)~~ formed from ~~fibres~~ fibers, the average size of the cells being such that the surface on which the flocking ~~fibres~~ fibers are placed is of a different profile from that of an envelope surface of the application face containing the emergent edges ~~(25)~~ of the cells.
